To whom it may concern

Letter of Support

This is to acknowledge that we have reviewed the "ZVC (Zero Vulnerability Computing): A New Paradigm" proposal and find it a radical but compelling approach to sanitizing computers against cyber threats. We will be happy to associate with this project as a third party auditor of the software developed in this project. As researchers in pervasive computing and pervasive data science, we have the expertise and wherewithal to audit the source code developed in this project, and deliver a professional audit report.

If there are further questions the undersigned can be contacted at the contact details given below.

Sincerely yours,

A handwritten signature in blue ink, appearing to read 'K. Kolomvatsos', with a long horizontal stroke extending to the right.

Konstantinos Kolomvatsos PhD
Director,

Intelligent Systems for Orchestrating Pervasive Computing
