Letter of support to *"ZVC (Zero Vulnerability Computing): A New Paradigm"* proposal

Dear Dr. Fazal Raheman,

I am very pleased to provide a letter of support for your proposal: "*ZVC (Zero Vulnerability Computing): A New Paradigm*". I have a clear understanding of the above mentioned proposal conceived by Blockchain 5.0 OU, the Estonian SME that you are directing. I strongly support the development of this radical approach to proactively counter cyberattacks and I am willing to actively participate in future endeavors to bring this technology to marketplace. Any support in building this technology will positively contribute to Europe's ambition of leadership in cybersecurity.

SecLab (https://seclab.cs.unipi.gr/), the security research lab of the Department of Informatics at the University of Piraeus, which I am currently leading, is actively involved in various cybersecurity R&D projects, both at an EU and national level.

In light of this proposal, SecLab would be glad to provide support in the initial testing of this technology by organizing a security challenge, if possible in the context of national or international cybersecurity exercises in which we actively participate for several years.

Sincerely,

Dr. Panayiotis Kotzanikolaou
